

Mahdiyar

Frontend Developer & Product Designer (React)

Remote · Portfolio: khane-bazar-118.ir

PROFESSIONAL SUMMARY

Product-minded frontend developer with 3+ years of experience designing and building responsive React applications. Bridges design and engineering: prototypes in Figma, then ships production-ready, component-driven interfaces integrated with REST APIs. Focused on data-rich dashboards, mobile-first experiences, and AI-powered products.

CORE SKILLS

Frontend	React, JavaScript (ES6+), HTML5, CSS3, responsive and mobile-first development
Design	Figma, wireframes, prototypes, design systems, user flows, information hierarchy
Product UI	Dashboards, forms, tables, cards, navigation patterns, empty / loading / error states
Integration & Tools	REST APIs, asynchronous data handling, Git, browser debugging
Emerging	AI-assisted development, Web3 / blockchain web applications

SELECTED PROJECTS

Khane-Bazar-118.ir | Web Application

Design & Development · React

- Designed and built a responsive React application with a reusable component library, delivering a consistent experience across desktop and mobile.
- Structured navigation and product presentation so users can browse and find items quickly.
- Owned the full frontend: UI design, component architecture, and responsive behavior.

React Web Applications | Freelance & Personal Projects

Frontend Development · React, JavaScript, REST APIs

- Built and maintained React interfaces integrated with REST APIs, handling asynchronous data and loading / error states.
- Created reusable components to improve maintainability and speed up development.
- Refined UI details and interactions with an emphasis on usability.

EDUCATION

Computer Studies

LANGUAGES

English — Fluent

AVAILABILITY

Open to remote roles. Experienced in collaborating with designers and engineers to turn product requirements into polished, responsive interfaces.
